

COFFEE TABLES

valid from 01.03.2022

GWINNER[®]

Product and quality information

Why purchase one of our coffee tables?

- // Our furniture ensures you can be the perfect host, yet still live comfortably.

- // Quality begins by choosing the right materials. For that reason, Gwinner has been a member of the **Gütegemeinschaft Deutsche Möbel e.V.** (German Furniture Quality Association) for years – strict quality conditions, applicable DIN standards and safety regulations all go without saying. DGM's prestigious "Golden M" accolade is only awarded to furniture that has been tested in terms of safety and home hygiene. Ongoing quality checks ensure that every piece meets the home-hygiene requirements set by the German Federal Health Authority.

- // To protect the environment, we only use wood from managed and controlled sources. Our specialists carefully process the solid woods and real-wood veneers used, drawing on their expertise and craftsmanship. Particular characteristics, such as structural differences and natural knots in the veneers and solid woods, highlight the natural character of this material.

- // Our matt silk lacquered surfaces are manufactured using state-of-the-art, environmentally friendly technology. These surfaces are hard-wearing and meet the requirements for a healthy home environment. To prolong the life of these high-quality surfaces, avoid placing sharp-edged, hot or damp objects on them.

- // The woods and lacquered specifically match the Gwinner living-room ranges.

- // Please note that every piece of veneer and solid wood used is unique and can vary widely from one tree to another. Despite our specialists taking the greatest care, variations from brochure illustrations and display goods cannot be ruled out. For the oak timber, wild core beech and knotty walnut finishes in particular, veneers with cracks and knots are purposely chosen and filled to be darker. Only this time-consuming process gives the coffee tables their desired natural character. We would like to expressly state that these growth and processing characteristics, as well as colour and texture differences, are desired features on our coffee tables and they increase the value by being unique, and cannot therefore be seen as a quality defect.

- // subject to errors, as well as design, colour and material modifications as part of technical progress.

Available finishes and planning information

The lacquers, veneers and solid woods used match the colours seen on the Gwinner living room ranges, dining tables and chairs.

Please note the available finishes in the description of each range as not every coffee table is available in every finish.

The colour and wood finishes have been specifically created for our models and can therefore not be found in any standard. Colour samples provide an approximate reproduction and serve only as a guide.

The coffee table collection can be configured using the Furnplan planning programme:

furnplan

Gwinner coffee tables have been awarded the DGM mark of quality by the German Furniture Quality Association

Country of manufacture: Germany

Home hygiene:

Gwinner coffee tables meet the requirements for a healthy home environment, and have been tested for harmful substances in accordance with RAL-GZ 430/1-1.

Care instructions:

Wipe with a dry duster or a slightly damp cloth. The lacquers are highly resistant to abrasion.
